INTRODUCTION

This guide gives a step by step introduction to connecting the FAST LTA Silent Brick WORM Archive in Version 2.20.0.6 to the PoINT Storage Manager in Version 6.3.

Step 1 — Create SMB user

- Go to Preferences -> SMB

- Configure Active Directory or add new local user

Step 2 — Create Compliant Archive

- Assign at least one Brick to the Stage Bricks. Brick may be

  - Standard Brick

  - FLASH Brick

  - WORM Brick. Will be partitioned. Size as needed. Default: 1TB

- Add one or more Bricks to the Archive

Step 3 — Create subvolume

- Volume Type: WORM with Retention (RWRO)

- Set retention to a default (here 10 y)

- Enable listing of Safefiles
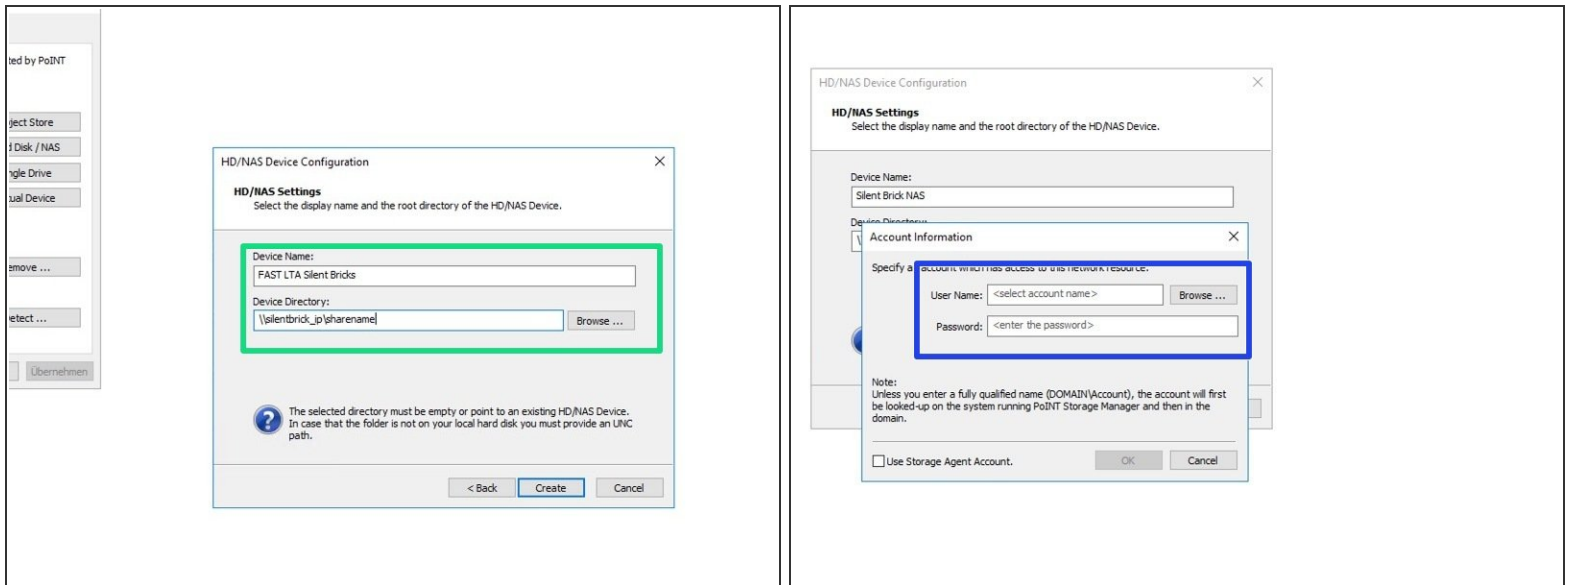

Step 4 — Create share

- To create a SMB Share click 'Add SMB Share'
  - Share path: /
  - Share name: as desired

Step 5 — Setup PoINT

- Choose Configure Devices under "Archive Devices"

- Add new archival Storage by clicking on "Hard Disk / NAS"

- Choose type FAST LTA

- Enter Name and Share path previously defined on the Silent Brick System
  - (i) Sharepath is a combination of archive name and share name. See Silent Brick UI for details.

Step 6 — Connect PoINT

- Enter Name and Share path previously defined on the Silent Brick System

  (i) Sharepath is a combination of archive name and share name. See Silent Brick UI for details.

- Choose user as defined on the Silent Brick System previously.

  ⚠ It may be necessary to create a local user account.
